

# Environment Setup

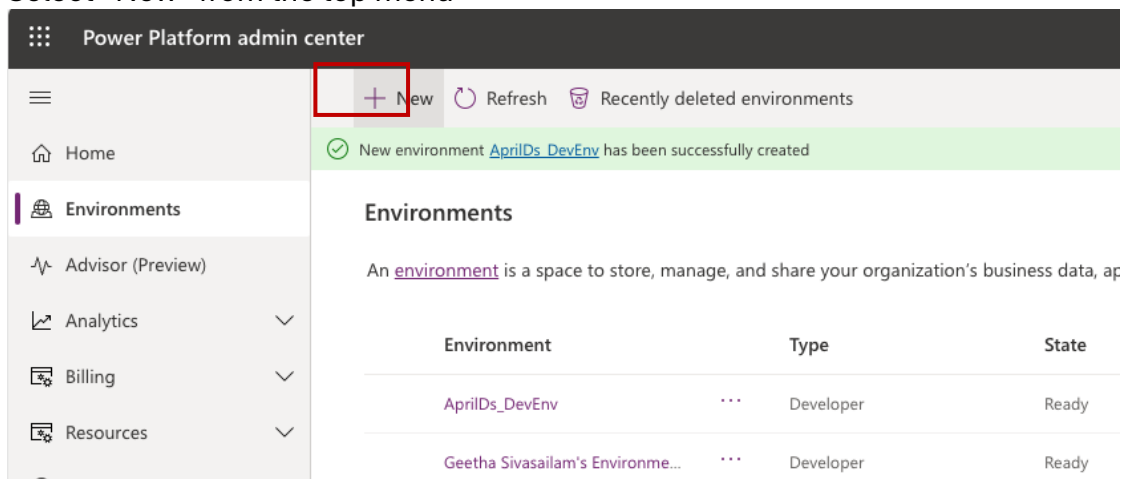

- You need a work or school M365 account to get started. If you have an existing work or school M365 account use that, if not, we can provide you with a temporary account.

## To create your dev environment:

- Open a new browser profile in the Edge browser using these instructions (<https://aka.ms/edge-browser-profile>)
- Sign in either with your current M365 work account or with the provided account (raise your hand if you need an account)
- Go to <https://admin.powerplatform.com>
- Select “Environments” from the left hand menu

- Select “New” from the top menu

- For Environment Name put your login, for example User1
- For account type set it to “Developer”. The settings should look like the following:

**New environment** ✕

ⓘ This operation is subject to [capacity constraints](#)

**Name \***

User1

**Group**

No groups available ▾

**Region \***

United States - Default ▾

A local region can provide quicker data access

**Type ⓘ \***

Developer ▾

**Purpose**

Describe the environment's purpose

**Add a Dataverse data store? ⓘ**

☒ Yes

Dataverse must always be added for the selected type: Developer

**Pay-as-you-go with Azure? ⓘ**

☐ No

Only environments of type Production and Sandbox can be setup for pay-as-you-go

**Next** **Cancel**

- It can take several minutes for your new environment to show in Power Apps.
  - To get to it immediately, follow these steps:
- Click on your new environment
