

The background features a stylized city skyline with various skyscrapers in shades of blue, purple, and pink. A bright yellow and orange gradient sky is at the top. In the upper left, a small blue superhero figure is shown in flight. In the lower right, two superheroes, a woman in a blue and red suit and a man in a blue and purple suit, are sitting on a golden fountain with multiple water jets. A large, stylized grey wave or swoosh is positioned behind the word 'CON'.

Lead Singer by Night.

Principal Cloud Advocate by Day.

Copilot queen with a low-code dream

YouTube Educator & Content Creator

Cat lady. LEGO hoarder.

Mission Plan

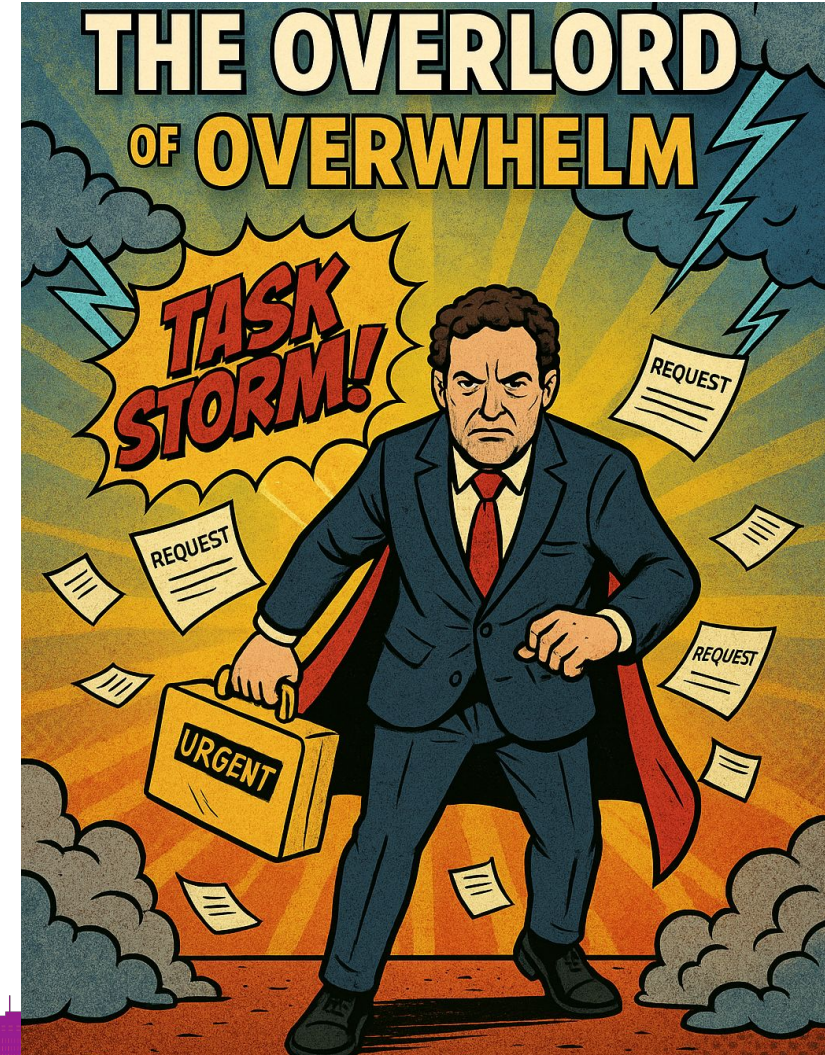

- Meet your superpower:
Crafting killer prompts
- Unlock your secret weapon: AI
Builder (turn those prompts
into power!)
- Deploy your dream team:
Power Apps, Power Automate,
and Copilot Studio

PROMPTERS, ASSEMBLE!

The Villain: The Overlord of Overwhelm

- Drowns teams in endless requests 🌀
- Never gives clear requirements 🙄
- Drops urgent tasks last-minute 💥
- Loves chaos. Hates structure.

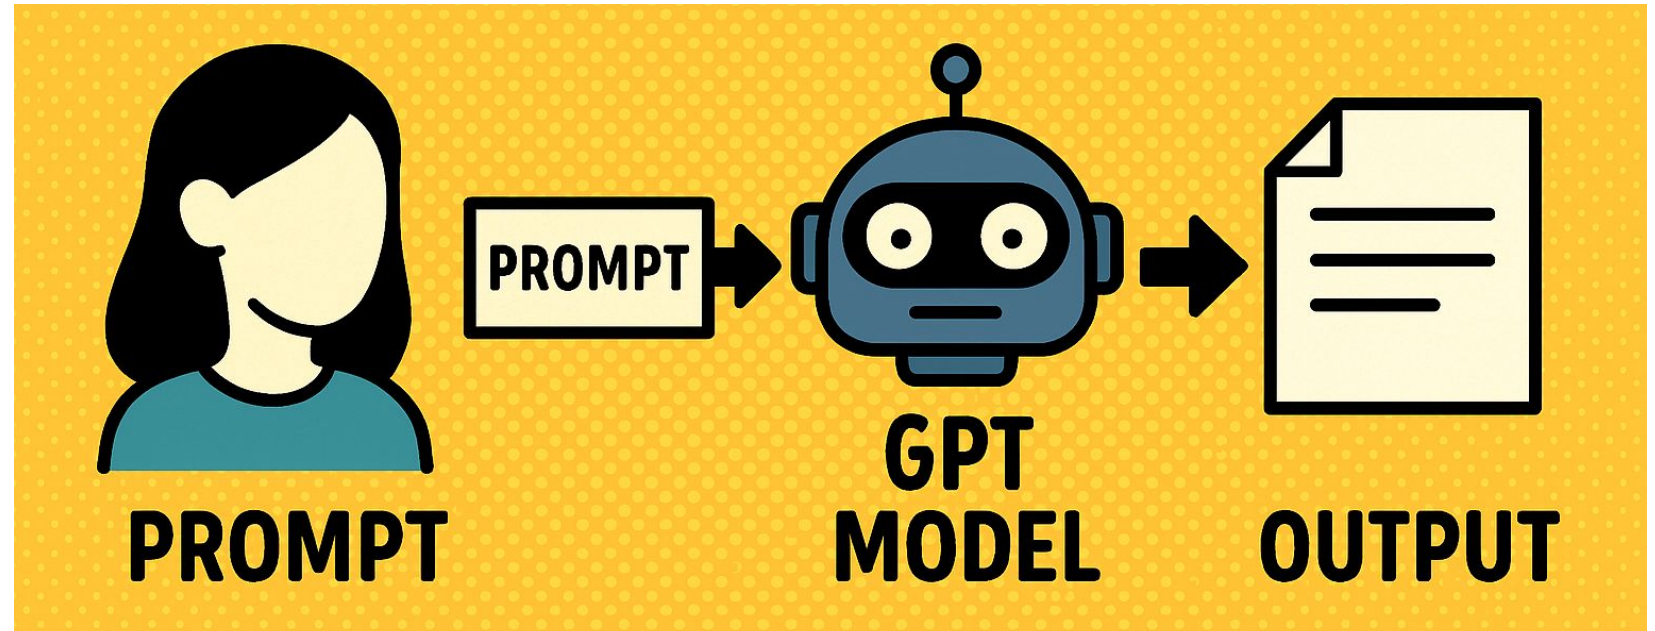

Prompt Power Activated!

- Prompts = your superpower – You tell the AI what to do, and it builds it for you
- Works across the Power Platform – Use prompts in Power Apps, Power Automate, Copilot Studio, AI Builder
- Natural language > code – Speak human, build like a dev
- More clarity = better results – Specific prompts save the day

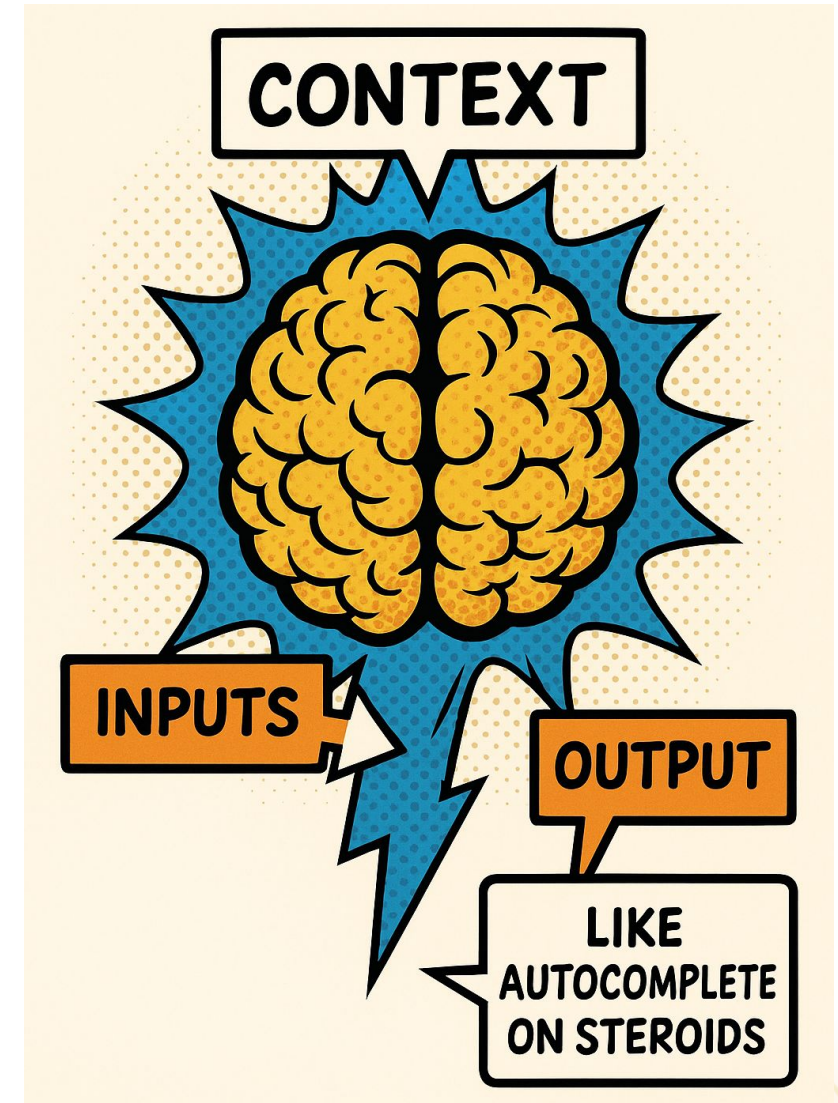

Prompts are the language of AI

- A **prompt** is just a *carefully worded instruction*.
- It tells the AI what you want, how to format it, what tone to use, etc.
- The more specific the prompt, the better the outcome.

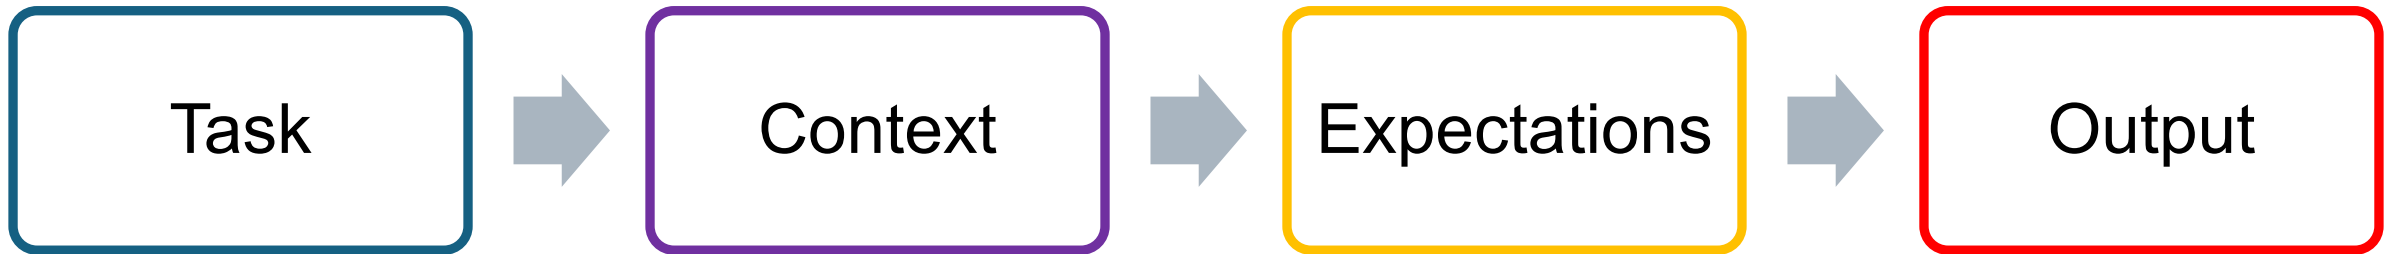

Inside the Mind of GPT

- GPT models predict the next most likely words based on your input.
- Your prompt sets the tone, format, and goal.
- It's not reading your mind — it's reading your instructions.

The Prompt Formula

The Formula in Action

Task

Context

Expectations

Output

Create a product feedback summary based on recent customer  reviews. The summary should identify key themes, overall sentiment, and any recurring issues or praises. Format the summary to be concise, and present the information in a clear, easy-to-understand manner suitable for a marketing team meeting.

The First Rule of Prompt Club... Show, Don't Tell

Instructions ... Model: GPT-4o mini Test

Write a formal summary of this support ticket

Model response Output: Text

****Support Ticket Summary****

****Subject:**** URGENT: Unable to Log into My Account

****Submitted by:**** April Dunnam

****Description:**** April Dunnam is experiencing difficulties logging into her account on [platform or service name]. She encounters either an error message stating "[specific error message]" or the login screen refreshes without proceeding when entering her credentials. Despite verifying her username and password, clearing her browser cache, trying multiple devices, and attempting a password reset, the issue remains unresolved. The problem began on [date/time], and she urgently requires access for [reason, such as work, an upcoming deadline, or a necessary service]. April suspects the issue may be related to [possible cause, e.g., a system outage, security restrictions, or account lockout].

****Request:**** April requests an investigation into the matter and guidance on regaining access to her account as soon as possible. She is willing to provide any additional verification needed and emphasizes the urgency of the situation, as it is significantly disrupting her ability to use the platform effectively.

****Priority:**** High

Instructions ... Model: GPT-4o mini Test

Write summary of this support ticket in this style:
'Customer reported issue X. Impact is Y. Resolution steps were Z.'
Use clear, formal tone.

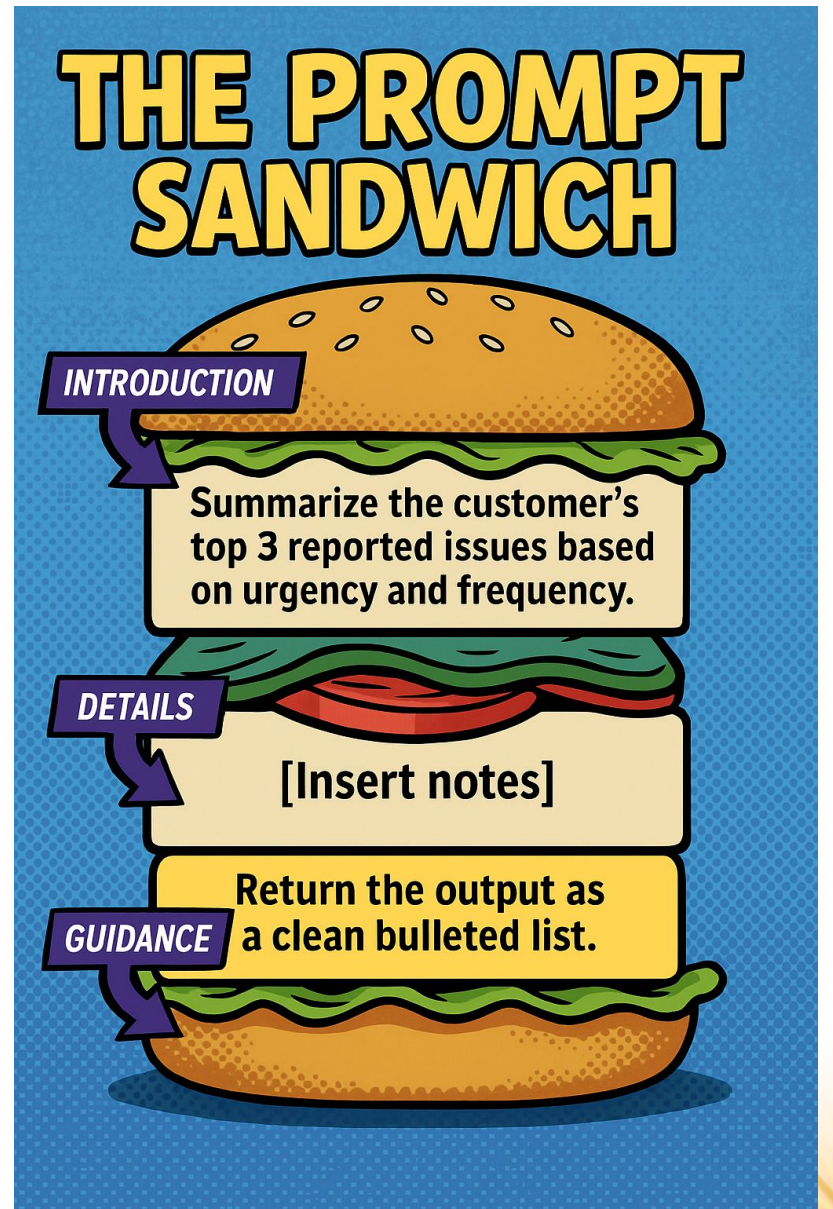

Model response Output: Text

Customer reported an issue logging into their account on the specified platform. The impact is significant, as the customer is unable to access their account, which is disrupting their ability to use the service effectively. Resolution steps taken include verifying credentials, clearing browser cache, trying multiple devices, and attempting a password reset, but the issue persists. The customer requests urgent assistance to regain access.

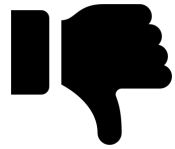

The Second Rule of Prompt Club... Use the Prompt Sandwich

- Summarize the customer's top 3 reported issues from the text below. Focus on urgency and frequency.
[Insert customer notes]
Output a bulleted list with the 3 most important problems

The Third Rule of Prompt Club...

Keep the Mission Brief

- As part of our quarterly review, we're analyzing a massive dataset that includes multiple departments and regions, and we want a detailed summary of key patterns, especially ones related to seasonal sales changes, plus predictions for Q3 trends, ideally focused on the European market — oh and make it easy to read

- Summarize key sales patterns by region.
[Insert data]
Focus on seasonal trends and predict Q3 results for Europe

The Fourth Rule of Prompt Club...

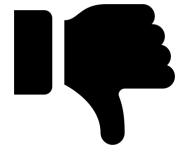

Take it one step at a time

- Longer prompts need more structure
- List specific steps in order
- Use bullet points or words like first, next, finally

The Firth Rule of Prompt Club...

Expect plot twists (contradictions)

- What's the sentiment of this review?"

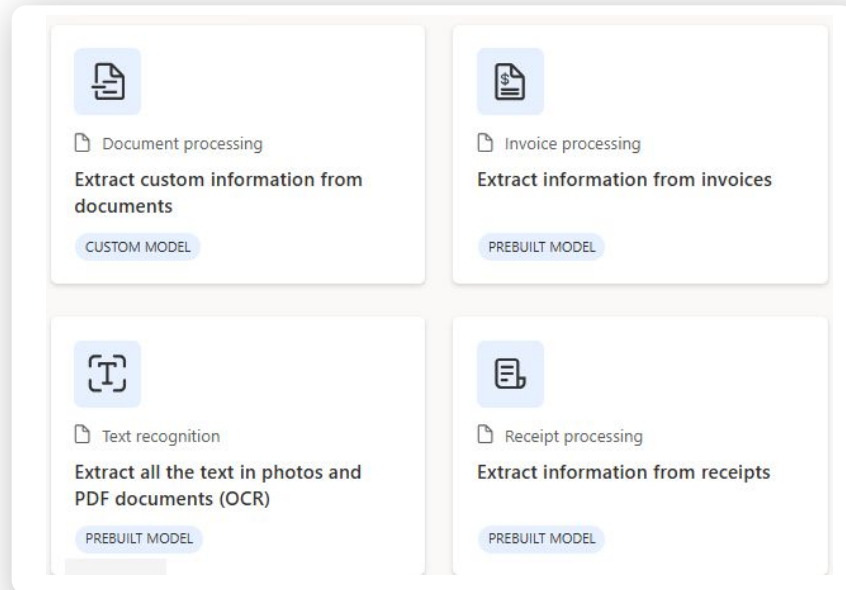

Input: "I love the service, but I'm never coming back."

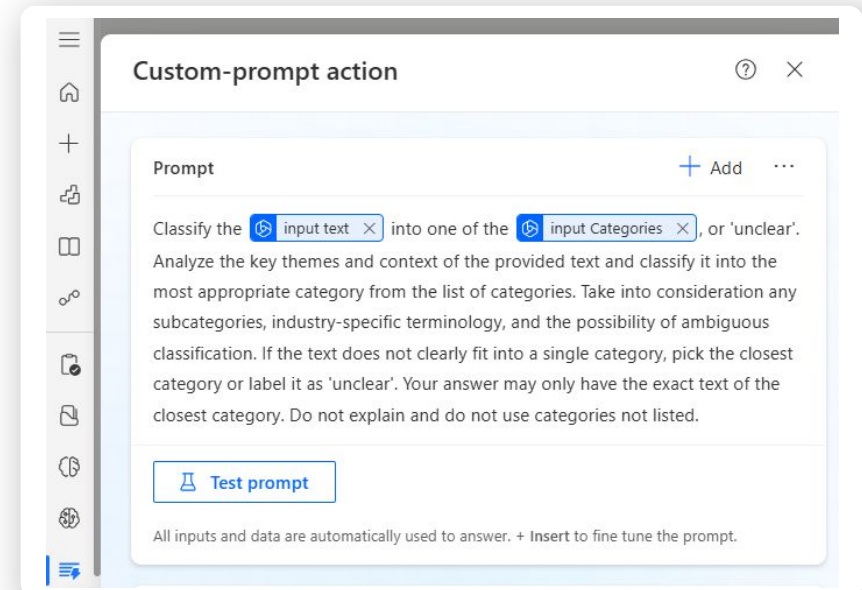

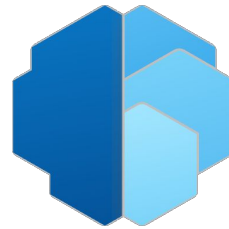

- Classify sentiment as positive, negative, or neutral.
If mixed, prioritize intent and future actions over emotion

AI Prompts

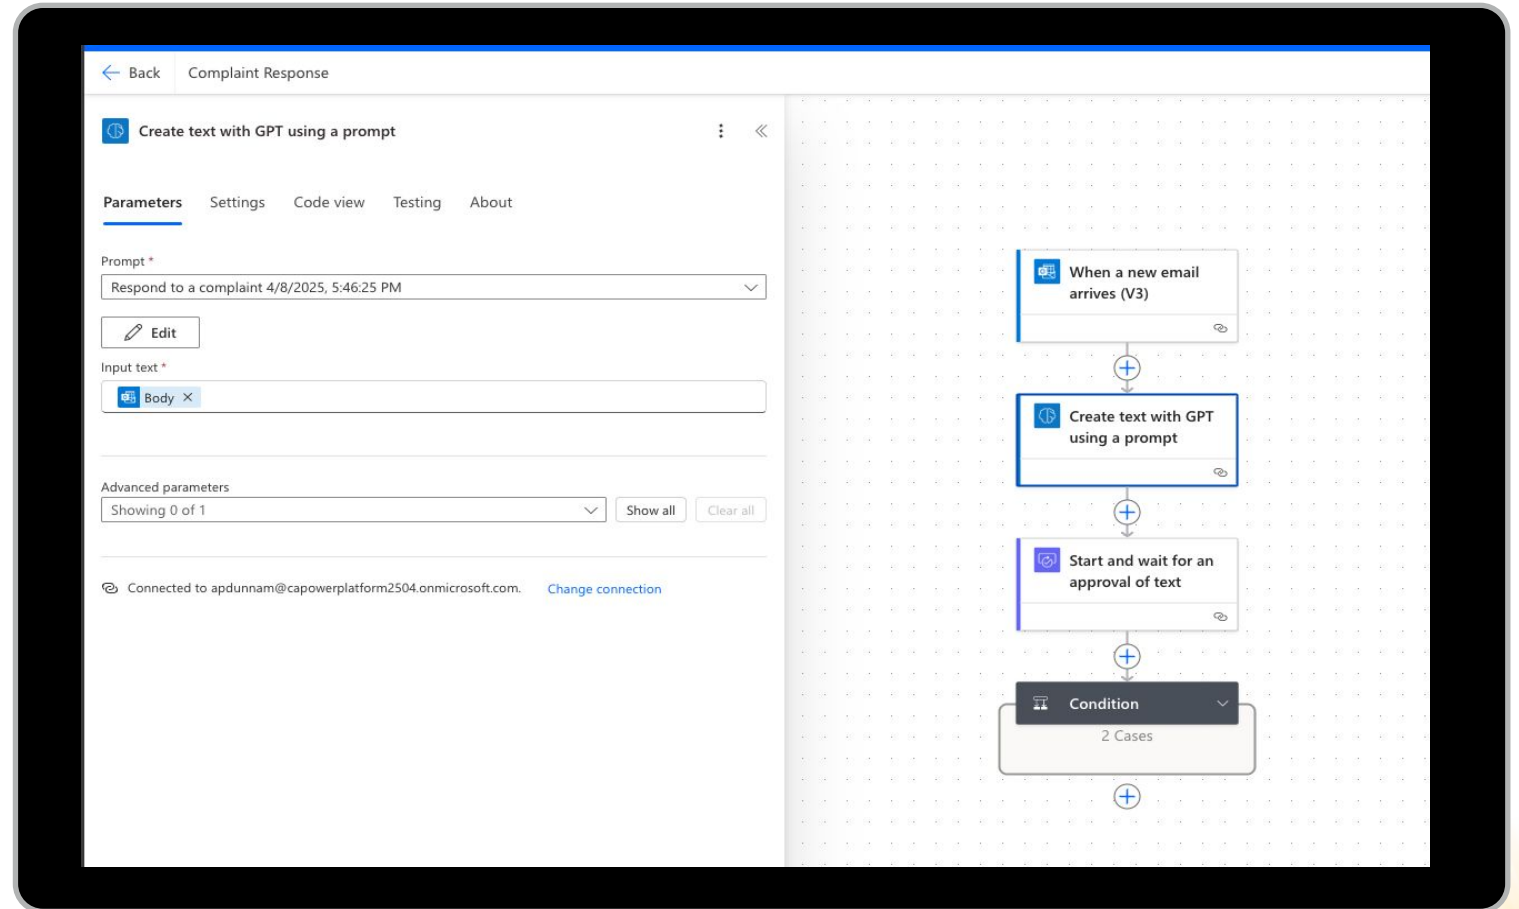

DEMO

Building and Testing a prompt

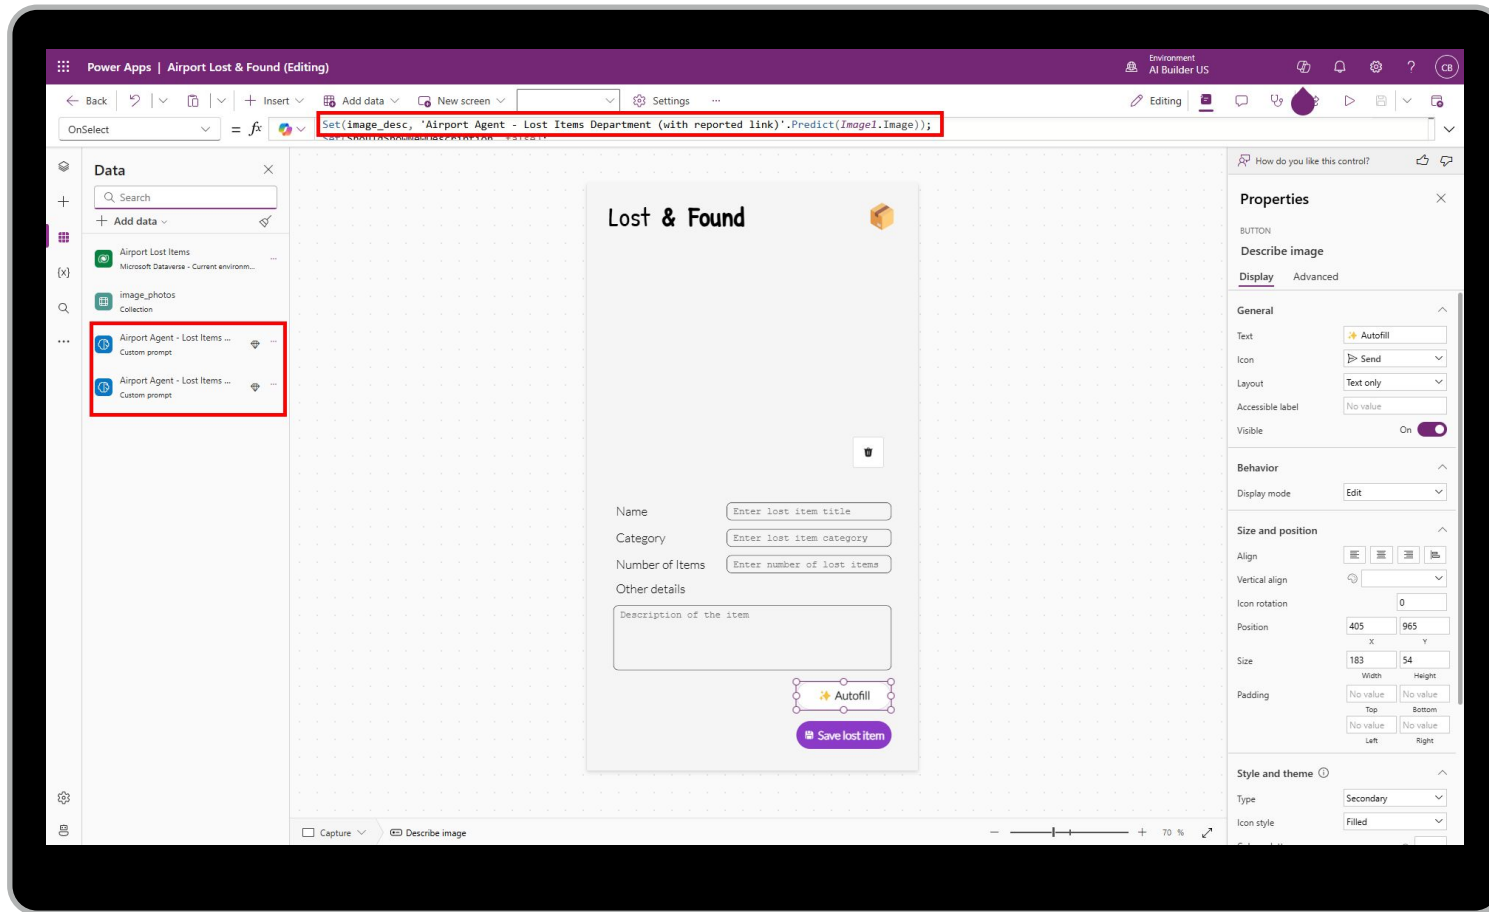

Add AI Intelligence to Automations

Add Prompts to your cloud flows
Augment your processes with AI

Make your Power Apps more Intelligent

Add GPT Prompts to extent App controls

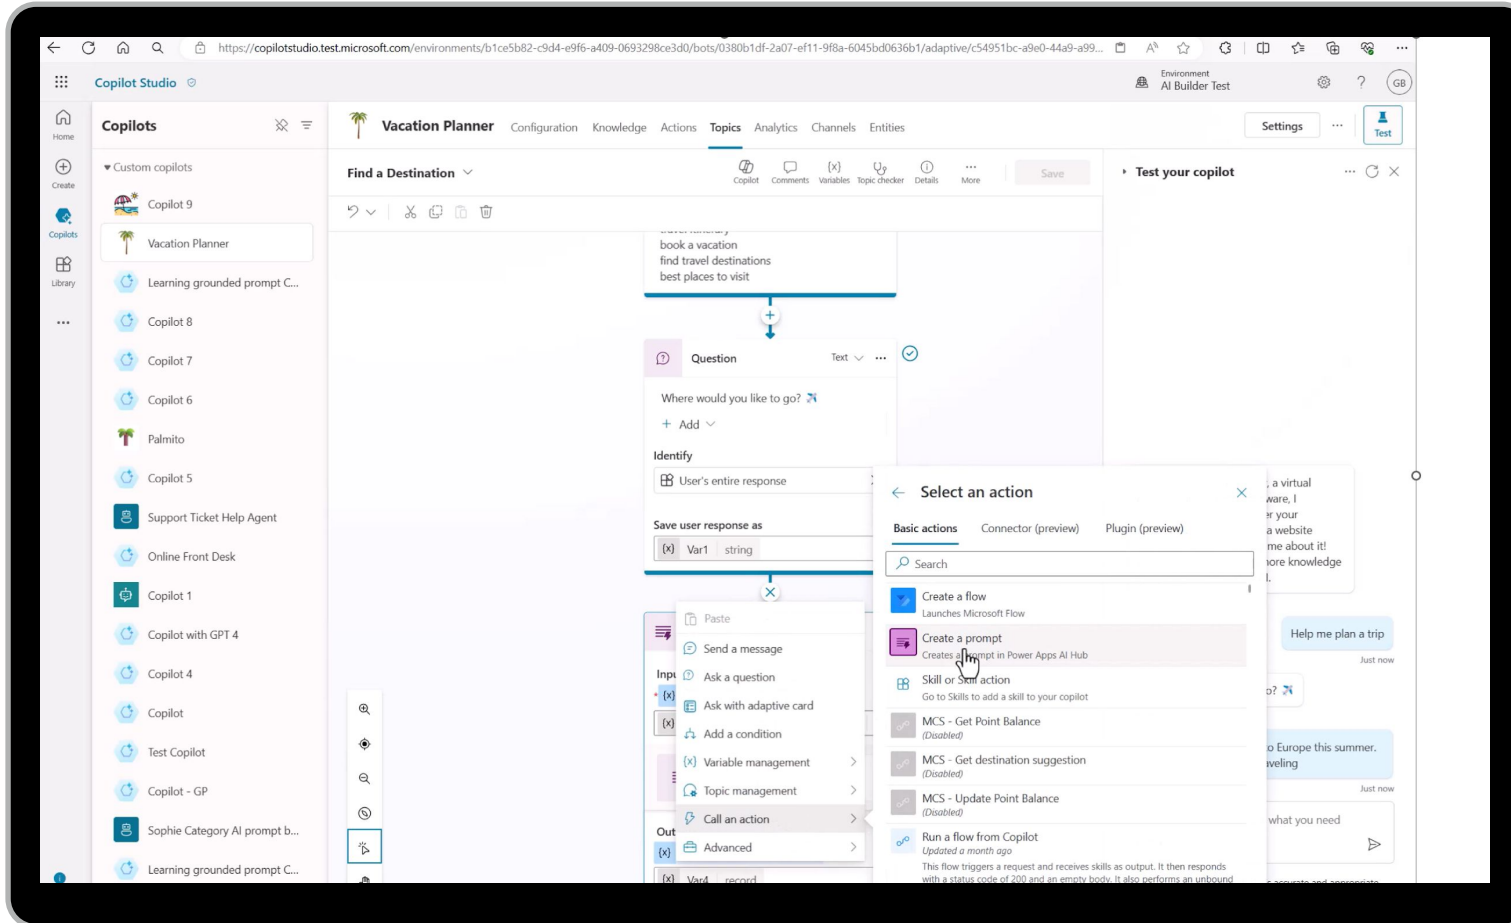

Add custom AI-powered capabilities to your controls (ex: image processing)

Invoke GPT with Power Fx

Leverage PowerFx to add summarization, data extraction, classification or content generation behaviors to your text controls

Customize your agents

Customize Copilot behavior

Add business specific behaviors
or modify existing Copilots
behaviors using natural language

Improve response accuracy

Guide Copilot to understand your
business data with natural language
instructions

Powerful data transformations

Parse and transform user inputs to
map to your data standards

Finding your scenario for AI Prompts

Document Processing

E-mail Classification

Content Generation

Information extraction

E-mail Reply

Custom Summarization

Predicting Outcomes

Image Processing

Identity Validation

Translation

Data Reshaping

Data Analysis

and more...

Prompt Easy Button

- Copilot to the rescue!

+ Add content

 Write your prompt with Copilot

Classify incoming emails in the following classes. Account changes, Balance Enquiries, Loan, Online payments, Log-in issues.

 Summarize text

 Extract information from text

 Classify text

 Sentiment analysis of text

 Respond to a complaint

Summarize text

Create concise summaries of any text, such as paragraphs, articles, or documents.

Extract information from text

Identify and extract relevant information from documents or online resources.

Identify text
Identify the tr
scientific, bus

Analyze emoji sentiments

Detect the sentiment of a text and reply by emojis.

Analyze word frequency

Analyze the frequency of a word in a text.

Identify text

Identify narra

Extract contact names and mailing addresses

Extract the contact name and mailing address from a text.

Identify facts and opinions

Separate facts from opinion in text.

Detect text

Dete
text.

Professional Development Plan

Description

This prompt helps with outlining steps for career growth based on goals

Prompt

Design a professional development plan for someone aiming to achieve the following objectives, resources and tools and a timeline for activities. Format the plan to be clear easy-to-follow manner suitable for a junior level employee.

Supported Language(s)

[English](#)

Meet Your Models

Model	Status	Ideal For	Notes
GPT-4o Mini	GA	Cost-effective tasks like summarization and basic content generation	Default model; faster processing; trained on data up to December 2023; context length up to 128k tokens.
GPT-4o	GA	Complex tasks requiring detailed analysis and multimodal capabilities	Higher performance; trained on data up to October 2023; context length up to 128k tokens.
o1	Paid Preview	Advanced reasoning tasks such as complex data analysis	Superior reasoning capabilities; slower response times; consumes more credits.

AI Builder Prompts Inner Workings

- AI Builder charges credits based on total token usage (input + output)
- Input tokens = your prompt + Dataverse/context data
- Output tokens = the AI-generated response (e.g., JSON, text)
- Cost is proportional to total characters and complexity of interaction
- Cost is different on different AI Models

Everything has a price...

Model	Token Context	AI Credit Cost per 1,000 Tokens	Notes
GPT-4o Mini (default)	Up to 128k	1 AI Builder credit	Optimized for low-cost general tasks
GPT-4o	Up to 128k	1.25 AI Builder credits	Higher accuracy, better for more complex logic
GPT-4 Turbo (legacy)	Up to 128k	1.5 AI Builder credits	Was the top-tier option before GPT-4o
o1 model (preview)	?	2 AI Builder credits	Advanced reasoning, slower & more expensive

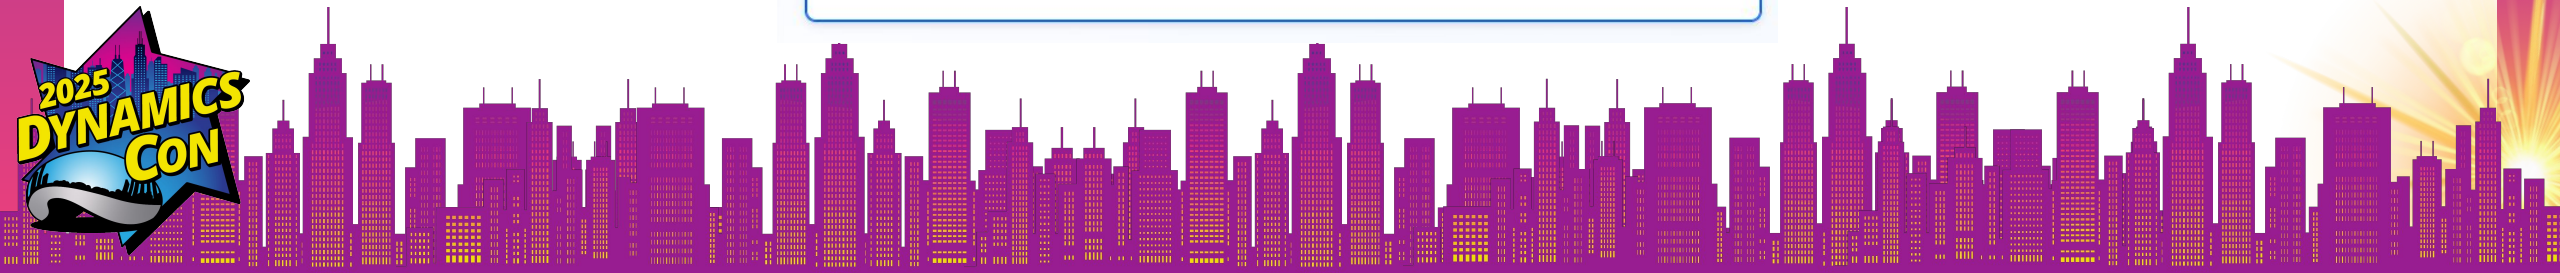

Prompts can be multimodal

Sales Contract Summary

ⓘ Changes will apply everywhere this prompt is used and could impact existing behavior.

Instructions + Add ⚙️ Model: GPT-4o ⋮ 🧪 Test prompt

Extract key terms, payment schedules, and termination clauses from the 📄 sales contract. Provide a summary in bullet points.

Multimodal Limitations

- 25 MB file size limit for all files passed into a prompt
- Support file types: PNG, JPG, JPEG, and PDF
- Can only process docs ≤ 50 pages
- Might struggle with larger docs – might not be accurate and skip information, especially for table lines.
- Image or document input isn't yet supported for prompts in Copilot Studio.

Check your temperature

Temperature	Functionality	Use in
0	More predictable and conservative outputs. Responses are more consistent.	Prompts that require high accuracy and less variability.
1	More creativity and diversity in the responses. More varied and sometimes more innovative responses.	Prompts that create new out-of-the-box content

Choose Your Output Wisely

- Text
- JSON

Prompt with JSON

Prompt

Extract key information from  myinvoice ✕

All inputs and data are automatically used to answer. + Insert to fine tune the prompt.

Prompt response

```
{
  "InvoiceDate": "Sept 21, 2015",
  "InvoiceNumber": "1726",
  "InvoiceTo": "Fabrikam, Inc.",
  "CustomerId": "5791",
  "SalesPerson": "Jacob Steffensen",
  "Terms": "Due on Receipt",
  "SalesTax": "$2.96",
  "Total": "$150.25"
}
```

Test prompt

Beware of Hallucinations

- When AI confidently provides an incorrect or fabricated answer. It's common with AI models and can happen when prompts are unclear or too broad.
- Be cautious with general prompts that can lead to AI hallucinations, and fact-check the output when necessary.
